

BTC BASED STABLE COIN

Enabling the nation for a digital future

Problem Statement

Bhutan lacks a globally recognized stablecoin.

Volatility in crypto prevents safe digital payments.

Existing stablecoins rely on foreign reserves and private companies.

Opportunity

- Bhutan owns Bitcoin reserves – a powerful global asset.
- By using BTC as collateral, Bhutan can issue a trusted digital currency.
- This enables financial independence and cross-border trade.

Our Goal

Develop a prototype of a BTC-backed stablecoin

Secure, transparent, and pegged to USD Value

TECHNICAL FEATURES

Transparent Reserve Dashboard :

- Real-time display of BTC collateral and supply
- Publicly auditable

Pegging & Stabilization Mechanism :

- 200% collateral ratio using BTC
- Automatic liquidation & rebalancing if BTC price drops

TECHNICAL FEATURES

Open-Source Smart Contracts

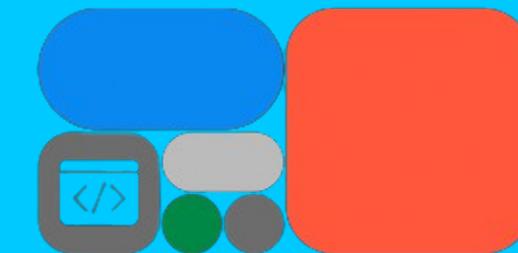

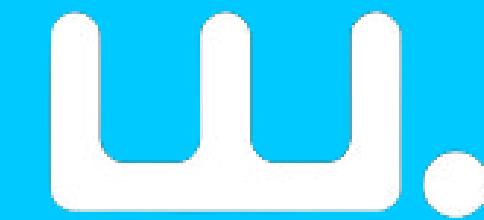

- Fully visible on public blockchains
- Community-audited & upgradable

Global Wallet Interoperability

- Use with Metamask, Trust Wallet, and 400+ global wallets
- Easy exchange & transfers across borders

METAMASK

EMONCAMP

okay...? but how does it actually work?!

BTNX IS PEGGED TO USD VALUE

USD VALUE IS CONVERTED TO EQUIVALENT BITCOIN

USER DEPOSITS BTC → LOCKED IN SMART CONTRACT

BTNX (TOKEN) IS MINTED AT 200% COLLATERAL RATIO WITH BIT COIN

IF BTC PRICE FALLS TOO MUCH, SYSTEM AUTO-LIQUIDATES OR REQUIRES TOP-UP

USERS CAN REDEEM BTNX FOR BTC ANY TIME

Benefits for Bhutan

- **Trusted:** Backed by real BTC, not promises
- **Transparent:** On-chain proof of reserves
- **Trade-Ready:** Globally recognized digital value
- **Resilient:** No dependence on USD reserves or banks
- **Digital Nation:** Positions Bhutan as a blockchain pioneer

Global Impact

- Attracts foreign crypto users & investors
- Builds cross-border digital trade network
- Supports Bhutanese people with a safe and modern currency

EMONCAMP

THATS IT!!

ANY QUESTIONS?
